Dear Dr. Carter:

It is my pleasure to acknowledge the reading growth experienced by the students at Rosenwald Elementary. All grades made substantial improvement in reading (except the fourth grade scores remained static) and as a result our school designation changed for the better.

Among the elementary schools in Palm Beach County, we stand alone as the school that achieved all 39 of the quality accreditation standards of the Florida Department of Education and earned Adequate Yearly Progress and the letter grade of C, a first for our school. As you know, these standards are tied to student performance on state assessments.

I am happy to acknowledge that the students at Rosenwald Elementary who completed the Reciprocal Teaching tutoring sessions are reading better, engaging in discussions about their reading more than ever before, working on figuring out ambiguous information found in text, and are representing themselves as self-directed learners. We thank you for your assistance and support.

Good job! See you next year!

Sincerely,

  
Estella Pyfrom
